To all that are concerned

I can tell you that after my head injury my whole life changed. I had short term memory loss and felt very sleepy with double vision. My independence was taken from me. I went to stay with my family and had to sleep on the bottom bunk in my nephews room. I had no help from the State and went through all my savings, after selling my house that was paid off.

If I had lost my arm in my wreck instead of my mind I would have had help. But instead I was left to fend for my self and it has been a long hard road.

Please help fund R.E.S.

because, It could be your that needs help!

Thanks

R.E.S.

P.S. I'm still recovering, ten years later!
